When negative thoughts enter your head, think of what Gandhi once famously said: "I care by just the amount of his thoughts. What he thinks, he becomes." So stay positive and all your troubles will feel much smaller.

A Report on Jal-Diwās Celebration on 22-07-2019

Today Climate Change is a serious problem prevailing in the globe. Out of many issues associated with Climate Change, one is associated with availability of potable water. Water is essential to our daily lives. It is important to remember that care in our water use habits should not only be taken in times of water shortage. Sensible water use can reduce the amount of stress that is placed on our resources, both by limiting water withdrawals and by decreasing wastewater distribution. Conserving water reduces wear and tear on major resources such as water and wastewater treatment plants and the distribution systems that deliver water to the public. Using less water can also enable us to become more flexible during times when there is a water shortage. With these and many other ideas for water conservation, Jal-Shakti Abhiyan is initiated by Government of India to bring awareness in citizens about water conservation. Under this initiative, Jal-Shakti Diwas is celebrated on 22nd July in all the AICTE approved institutes.
